

President's Report

Firstly, I would like to extend a sincere thank you to all of our volunteers, committee members, and everyone who contributes their time and skills to the Hackerspace. Our community exists because people are willing to share their knowledge, lend a hand, and help maintain the space. Your efforts often happen behind the scenes, but they make an enormous difference.

This year saw a number of exciting improvements to our facilities. One of the biggest milestones was the installation and commissioning of our CNC Router. After plenty of planning and hard work from those involved, it is now fully operational and available for members to use. It is a fantastic addition to our workshop and opens the door to many new projects. We also got a new BBQ!!!

We also upgraded our internet connection and wireless network, providing members with faster and more reliable connectivity throughout the space. A special thank you goes to Leo and everyone who assisted with planning and implementing this upgrade.

Another welcome improvement was the installation of our new heat pump. Members have already appreciated a much warmer space during the colder months, and we can all look forward to a far more comfortable Hackerspace during summer as well. Thank you to everyone involved in making this happen.

Our membership numbers have remained fairly consistent over the past year. While growth is always welcome, maintaining a stable and active membership reflects the strength of our community. Every member brings something unique to the space, whether it's knowledge, enthusiasm, or simply a willingness to help others.

Our presence in the broader community has continued throughout the year through events. Members represented the Hobart Hackerspace at the Festival of Bright Ideas, where we had the opportunity to showcase making, technology, and hands-on learning to the wider public. We also delivered a workshop at the Tasmanian Museum and Art Gallery (TMAG), helping introduce participants to the creativity, curiosity, and collaborative spirit that defines our community. These events are a fantastic way to inspire future makers, share knowledge, and demonstrate the positive role the Hackerspace plays within Tasmania. Thank you to everyone who volunteered their time and expertise to make these events a success.

One of the highlights I want to highlight is the incredible contribution from Bob, who has volunteered many hours teaching coding and robotics to young people. Sharing technical skills with the next generation is one of the best investments we can make as a community, and Bob's dedication deserves special recognition.

A community garden has kicked off thanks to the efforts of Tiff and Chris. It has become another great example of the diverse interests within our Hackerspace and provides an enjoyable space for members to contribute outside.

Like many organisations, we also faced some challenges during the year. Following a safety concern that was raised, we experienced a difficult period that prompted us to carefully review how we manage safety within the Hackerspace. While it wasn't an easy time, our committee members came together, worked constructively, and used the experience as an opportunity to improve. It served as an important reminder that maintaining a safe, welcoming, and inclusive environment requires ongoing attention. The work we have done has strengthened our approach to risk management, and we remain committed to continually improving the Hackerspace for everyone. We have implemented some new safety improvements and a strengthened a vetting process for new members. We will continue to make improvements and suggestions are always welcomed.

As we look ahead, I encourage every member to stay involved. Whether it's volunteering, teaching a workshop, helping maintain equipment, serving on the committee, or simply welcoming new members, every contribution helps strengthen our community. The Hackerspace is built by its members, and its future depends on all of us continuing to share our time, knowledge, and passion.

I would also like to make special mention of Brian for his outstanding contribution to the Hobart Hackerspace. As both our Public Officer and Treasurer, Brian quietly undertakes a great deal of work that keeps the organisation running smoothly and ensures we meet our legal and financial obligations. Beyond those official roles, he has become a trusted source of knowledge, experience, and practical advice, a wise elder of the Hackerspace who is always willing to help, offer guidance, or share his expertise. His steady support, commitment, and countless hours of service have been invaluable, and on behalf of all our members, I would like to sincerely thank him for everything he does for our community.

Finally, thank you once again to ALL our committee, volunteers, and every member who has contributed over the past year. Together we have continued to improve our facilities, strengthen our community, and make the Hobart Hackerspace a place where people can learn, create, collaborate, and have fun.

I look forward to seeing what we can achieve together in the coming year, with a new committee and fresh ideas.

Jason Hammond
President, Hobart Hackerspace Inc
